

3 STEPS TO GO HOME SAFELY

STEP 01

SELECT APPROPRIATE COVERALL

Based on the tasks and hazardous environment you are facing!

STEP 02

CORRECT DONNING & DOFFING

Correct donning can maximize the effectiveness of the coverall, and properly donning it won't affect you with the contaminated coverall.

STEP 03

PROPER DISPOSAL AFTER USAGE

Contaminated coverall can be very dangerous. Hence, a used coverall should be sealed and dispose separately from other waste.
