# COMFORT FACTORS

The Breathability of Fabric

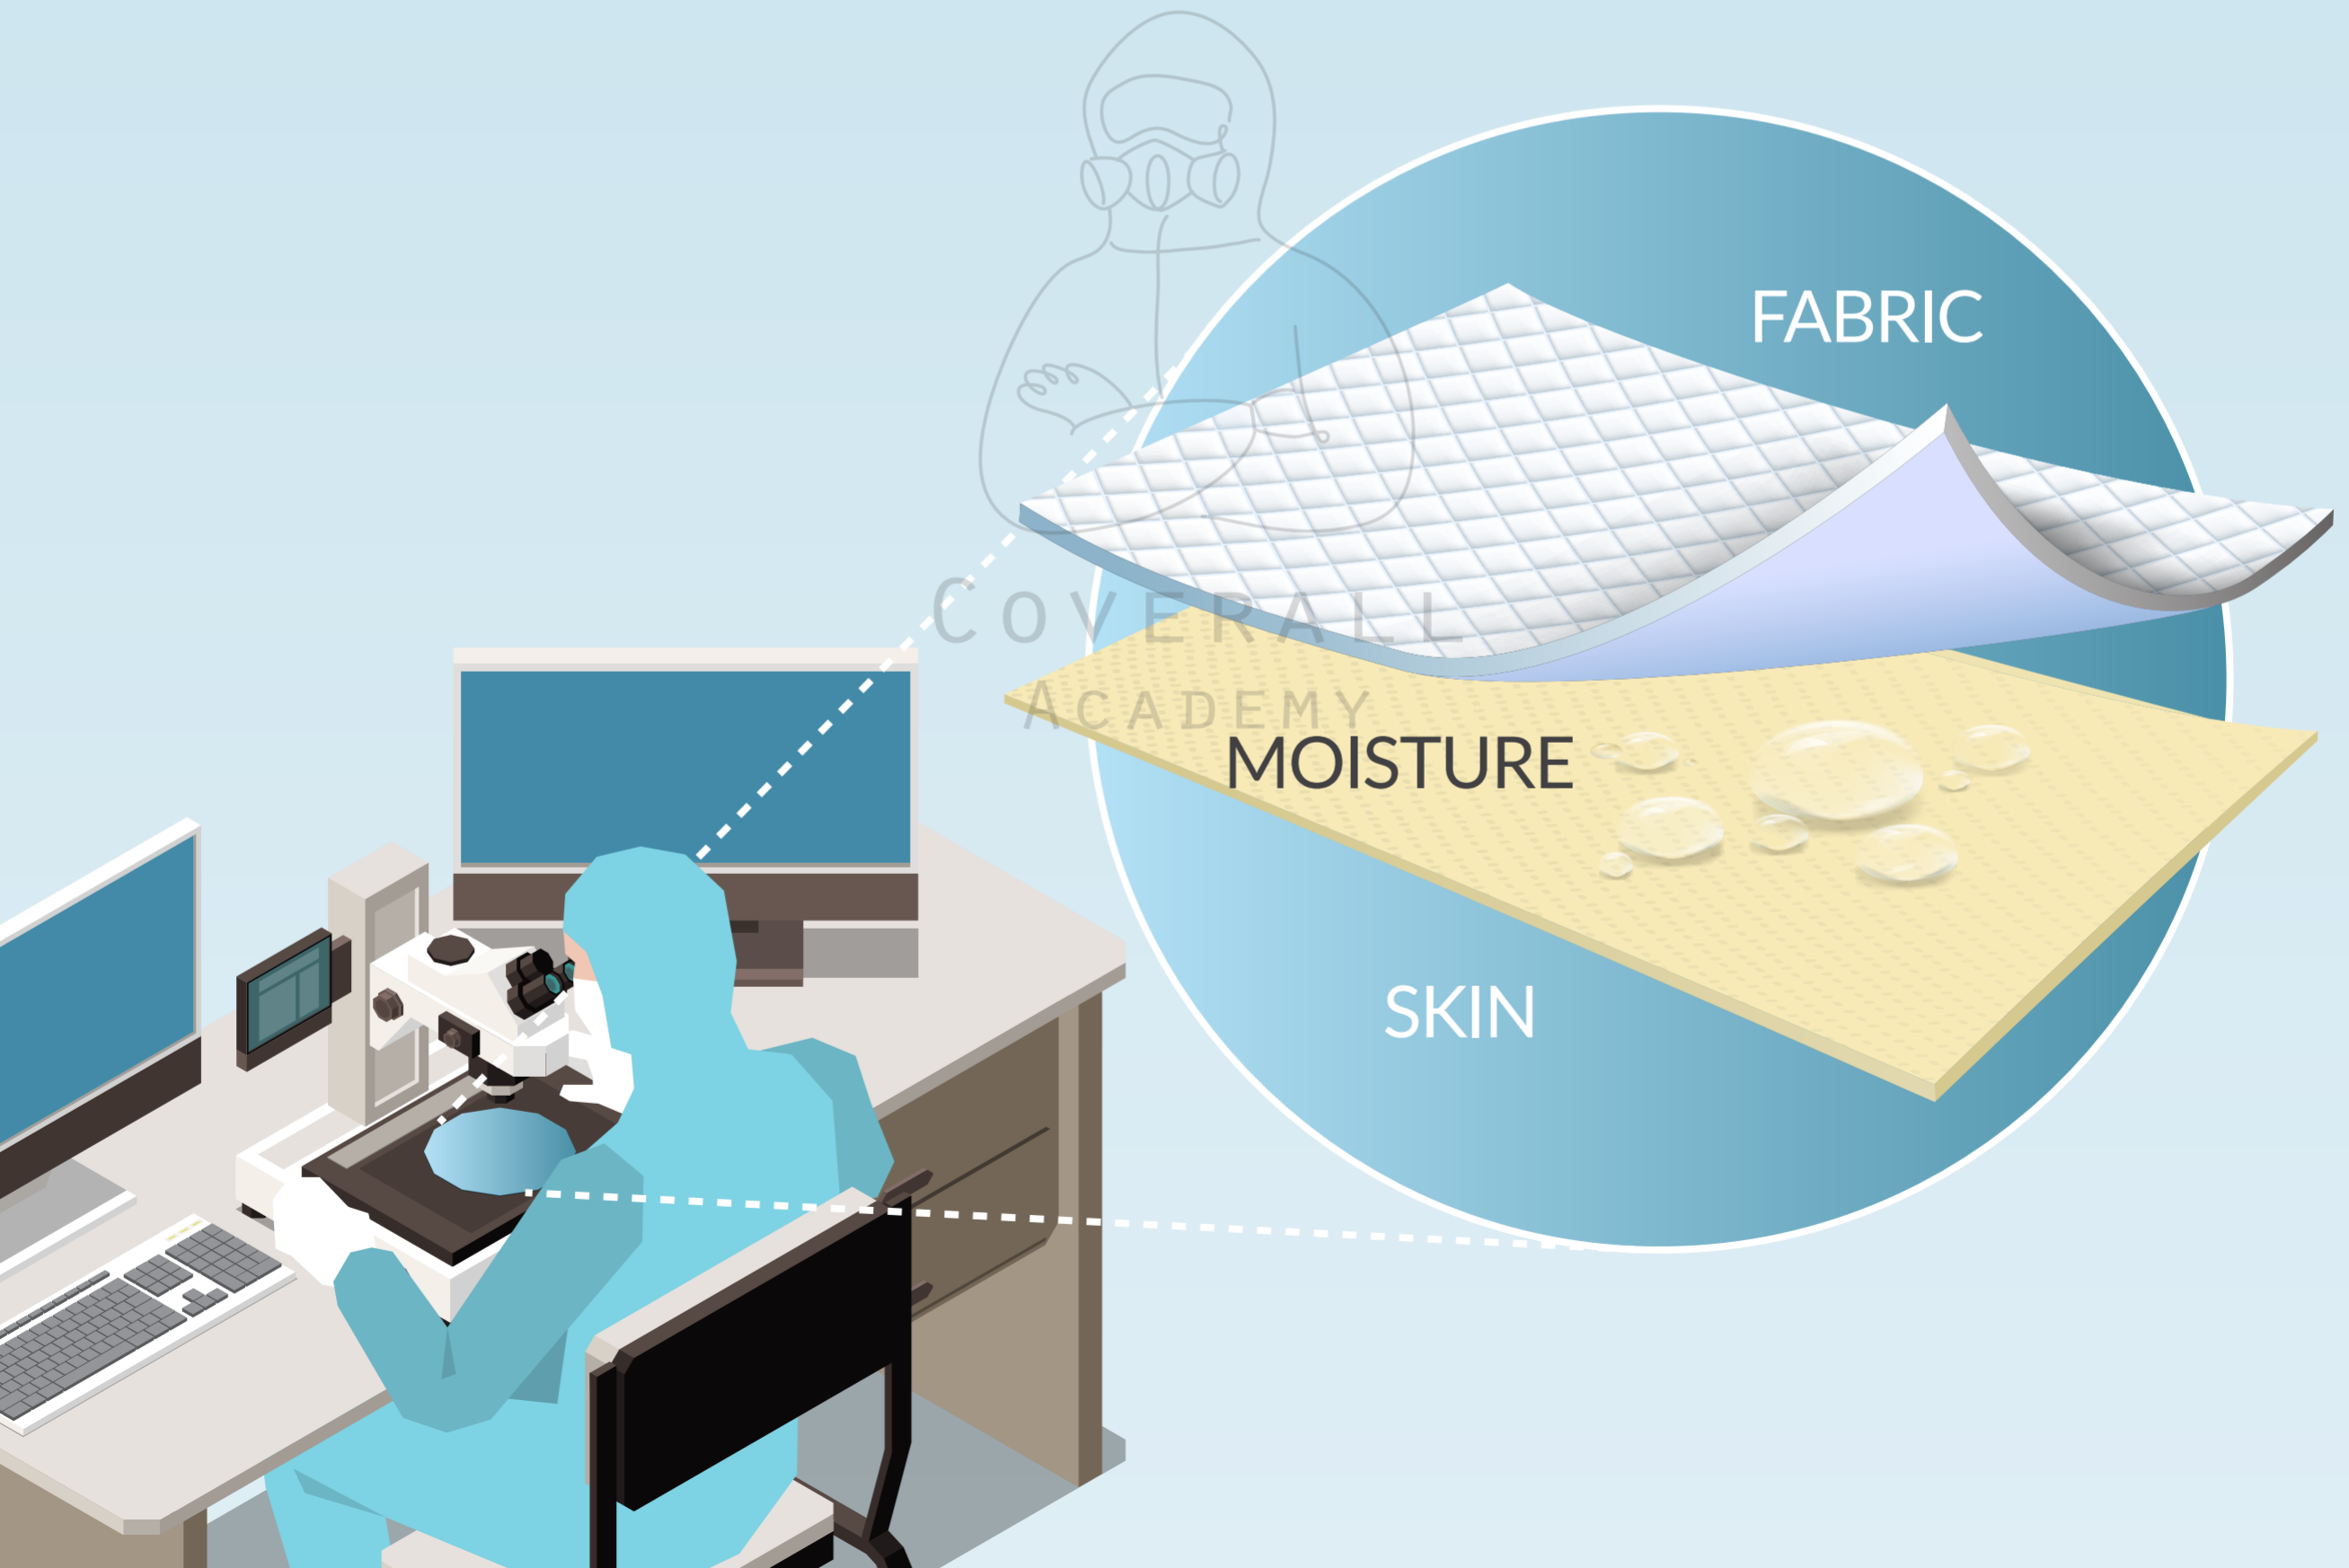

COVERALL  
ACADEMY

# COMFORT FACTORS

## WHY FEEL UNCOMFORTABLE?

Because the micro climate between skin and fabric is full with moisture, which cause hot and humid.

# COMFORT FACTORS

## 2 FACTORS FOR COMFORT

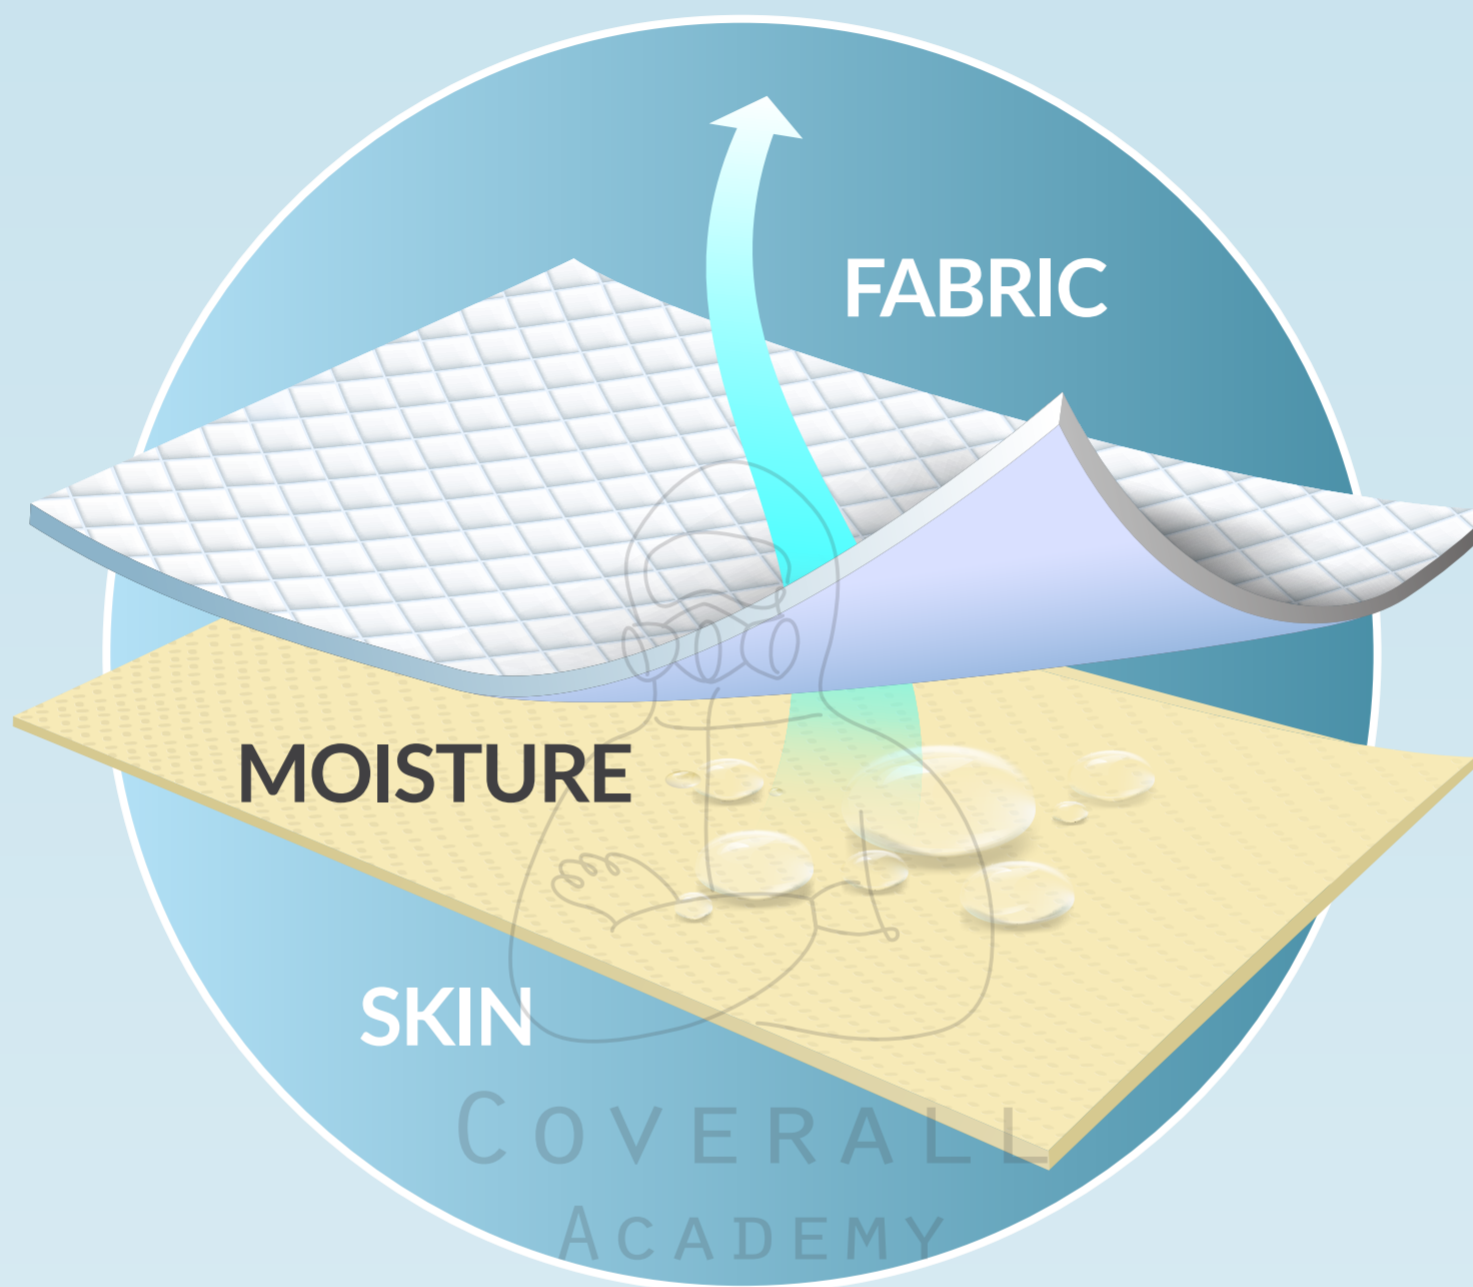

COVERALL  
ACADEMY

### MVT

How fast moisture moves from skin to outward of fabric

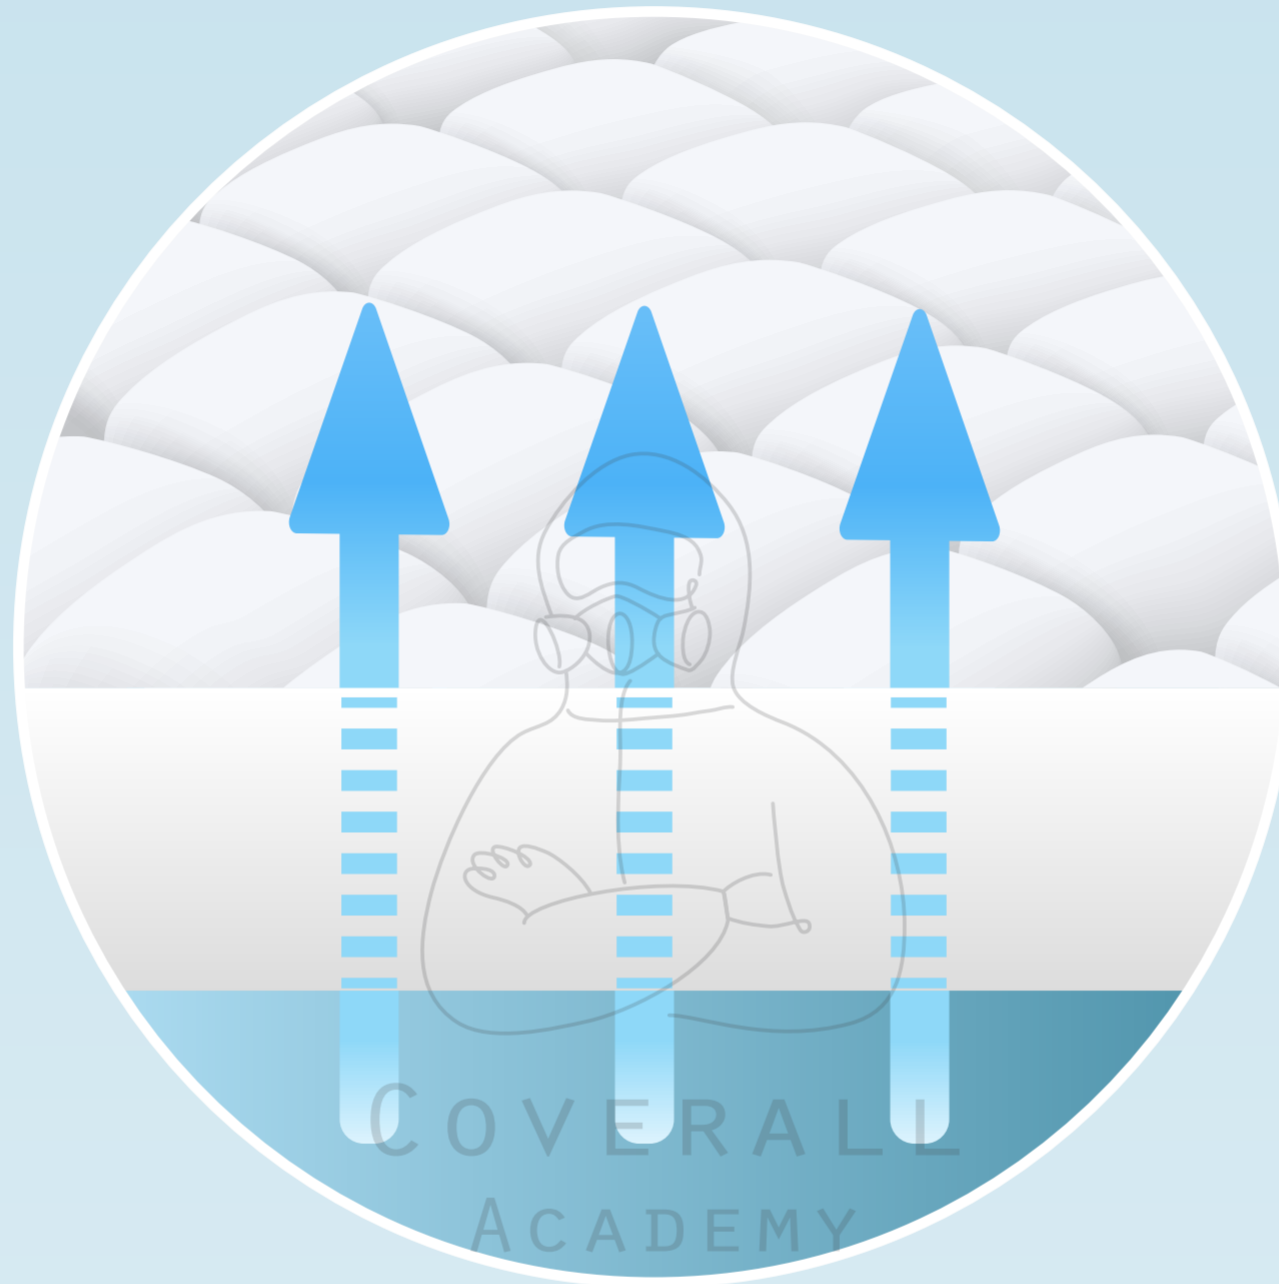

### Ret Value

How hard the moisture pass through fabric to outside

## 01.MVT

How many moisture can move from skin to outward of fabric under a certain of time.

## 02.Ret VALUE

when the moisture contact the fabric,  
calculate how much effort it take to pass through.

# COMFORT FACTORS

## HOW to FEEL COMFORTABLE

**Greater MVT**, means the moisture removed fast from the space between fabric and skin.

**Smaller Ret Value**, means the moisture pass through fabric easily.
